

Attension World Tour 2010

Friday 2nd of April 2010

Dear Madam/Sir,

It is our pleasure to invite you to the Attension World Tour meeting taking place in Seoul, Republic of Korea, on Friday 2nd of April 2010.

Attension World Tour presents our usability innovations in tensiometry, focusing on the latest technologies and concrete solutions to specific application challenges. Captive bubble experiments, Fowkes analysis method and Washburn powder measurements will be discussed among others.

Demonstrations will be performed, giving you the opportunity to get familiar with our tensiometers and their unparalleled ease of use. You are most welcome to bring your own samples for analysis (please inform us when registering).

Attension World Tour gives you a chance to meet and discuss applications with other researchers interested in tensiometry.

Participation is free of charge. You can register by replying directly to the invitation e-mail or on the phone by contacting Jackey Son from Hucom Systems at 031 204 5030.

Yours sincerely,

Jackey Son

Managing Director, Hucom Systems

Vanilla Chen

Asian Distribution Manager, Attension
Tel. +86 13816317221

Oskari Aro

Application Specialist, Attension
Tel. +358 409 022 016

Program

09:00 - 09:30 Arrival and coffee

09:30 - 10:00 Welcome - Honoprof

10:00 - 10:30 Introduction

Attension
Our tensiometers
AttensionLab

10:30 - 12:30 Applications

Insight into tensiometry for research, development and industrial processes

Case 1:

Measurement of low contact angles: challenges and solutions

Case 2:

Tracking surface chemistry changes using surface free energy calculations

Case 3:

Powder wetting comparative analysis

12:30 - 13:30 Lunch

13:30 - 15:00 Technologies

Optical tensiometers
Force tensiometers
Bubble tensiometers
Volumetric tensiometers

Demonstrations

Theta Optical Tensiometer
Sigma Force Tensiometer

15:00 - 16:00 Discussions and sample testing

Exact venue in Seoul to be announced few weeks before the event.
